

ANNA CASA INTERIORS

Bold coloured – glass walls and floors form a modernist backdrop to a highly select range of dramatic, sculptural, statement furniture in Anna Dodonova's destination showroom, Anna Casa Interior's, an inspiring space to be found in London's Chelsea Harbour. Established in the Design Centre in 2007, Anna Casa Interiors was personally designed by Anna to showcase a harmonious range of interior designs.

A glamorous individual with great personal style of her own, Anna personally chooses each of the dramatic pieces of furniture on show, curated from a stable of prominent international brands. Anna's background in art and graphic design is evident in the sleek, colourful, modern interior of the showroom, as is her love of strong, clean lines in Italian design. But her inspiration and influences extend far further than Europe. 'I travel all around the world for inspiration' says the globetrotting designer, 'and I find design ideas everywhere and in everything I see'.

Furnishings range from sparkling chandeliers, unique, handmade Murano glass dining tables, ultra – luxurious beds, sideboards and tables in hardwoods and metals and bespoke, wonderfully tactile soft furnishings.

Anna also provides an interior designer service for select customers on high – end residential, hotel and commercial projects around the world. Her background and training in interior, graphic and art design allows her to explore many different styles and mediums of furniture and design. Added to this, her keen eye for detail, creative vision and personal approach means each project is a reflection of the personality and lifestyle of the customer and made to their own specifications. The showroom is an invaluable asset to Anna's interior design clients and her team offers a full professional sourcing service supplying bespoke items not only from Anna Casa but other companies and contacts worldwide.
